

Transfer feature

Use trial version

Before purchasing the transfer feature, we strongly recommend you to try out to see if transfer feature works as demanded for your environment.

1

Tap [Purchase] button on setting tab.

2

Tap a shopping cart button of [Transfer TRIAL].

3

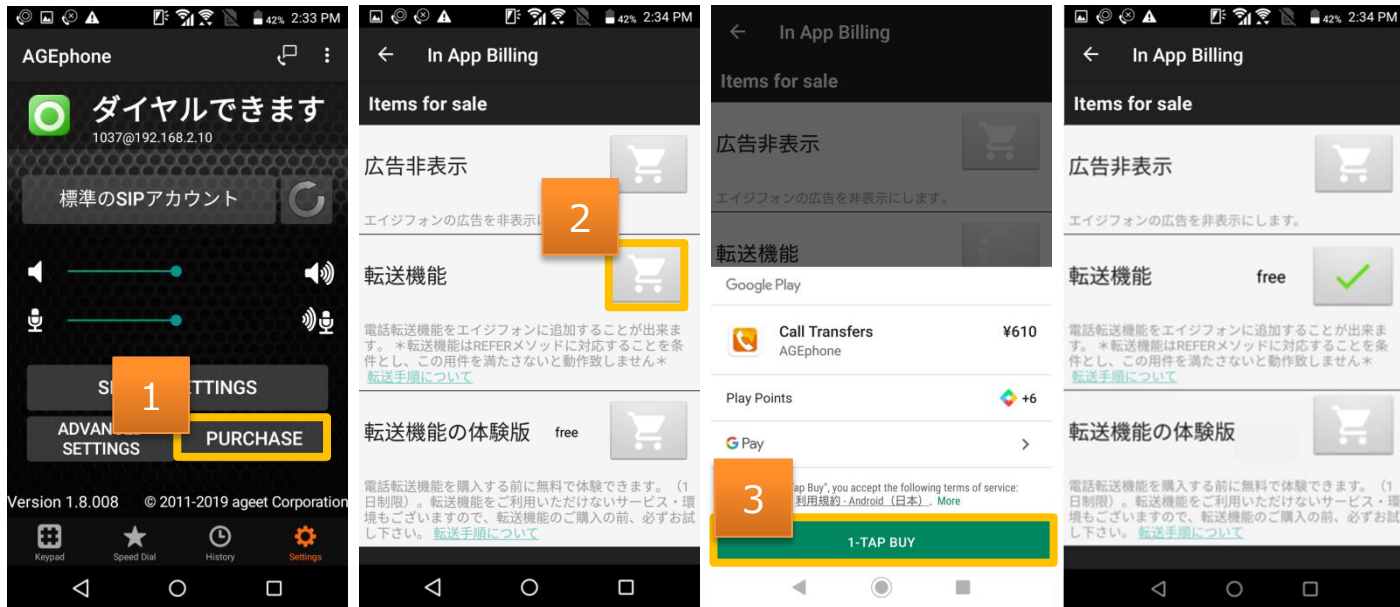

Transfer trial will be activated by tapping [TRY NOW] button.

※The transfer trial will be activated only after shopping cart button has turned to tick off silhouette.

Purchase the transfer item

Please purchase the transfer feature if you wish to use in practice after trial.

1

Tap [Purchase] button on setting tab.

2

Tap a shopping cart button of [Transfer item].

3

Purchase will be completed by tapping [1-TAP BUY] button.

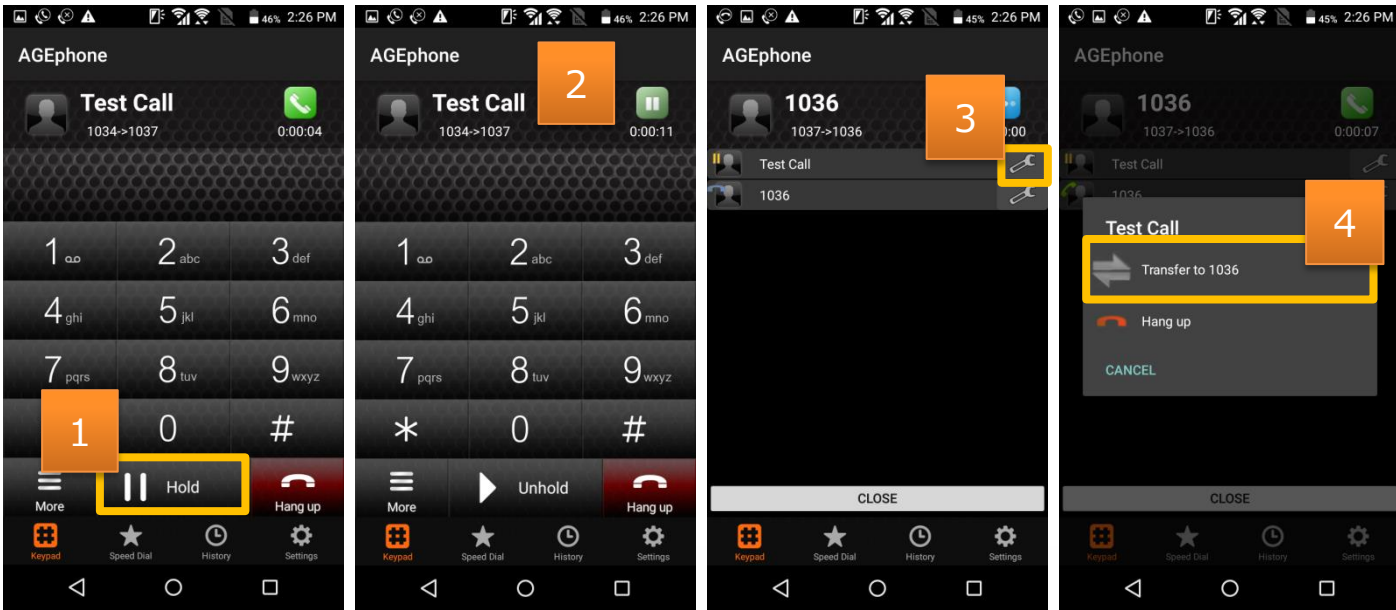

(The purchase method button differs depending on your settings and may look different.)

※Please make sure that the transfer feature works as demanded for your environment.
[You can try transfer trial as described in previous page.](#)

How to transfer a call

You can transfer a call on hold state by following below procedures:

1 Place the primary call on hold by [Hold] button.

2 Make secondary call to one you want to transfer and connect the secondary call.

3 Tap wrench icon of the primary call from the list.

4 Tap [Transfer to XXXX] button.

✘Note that your SIP server has to support REFER method to use this functionality within [AGEphone](#).
